DETAILED ACTION

1. Claims 1, 10-14, and 16-35 are pending.
2. Based upon the Amendment filed January 17, 2007, the rejections under 35 U.S.C. §112, 1st and 2nd paragraph, 35 U.S.C. §103 are withdrawn.
3. Upon further reconsideration, the rejections of nonstatutory obvious type double patenting of copending application 11/270,391 in view of 6,890,937 and nonstatutory obvious type double patenting of copending application 10/747,796 in view of 6,890,937 are withdrawn.
4. Claims 1, 10-14, and 16-35 are again rejected on the ground of nonstatutory double patenting over claims of U. S. Patent No. 6,890,937 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

The claimed subject matter overlaps. For instance, see claim 12 of the '937 reference wherein Z is O; R³ is G-A-R-E-Y; G is heteroaryl; A is a bond; R is aryl; E is -HNCO-; and Y is alkyl.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

5. Claims 1, 10-14, and 16-35 are again rejected on the ground of nonstatutory double patenting over claims of U. S. Patent No. 6,541,489 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

The claimed subject matter overlaps. For instance, see claim 9 of the '489 reference wherein X and Y are C; the sum of m, n and p is 2; Z is O; R³ is G-A-R-E-Y²; G is heteroaryl; A is a bond, R is aryl; E is -HNCO-; and Y² is alkyl.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Response to Applicants Remarks about the

Nonstatutory Obviousness Type Double Patenting Rejection

6. Applicants state upon allowance of the present claims that Applicants would be willing to consider an appropriate double patenting rejection and consider a terminal disclaimer if appropriate in order to send the allowed claims to grant.

It is the Examiner's position that:

- A proper rejection was made on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,541,489 and 6,890,937.

- The claims are not allowable based upon the reasons of record and the above rejections.
- In order to advance prosecution, a terminal disclaimer should have been filed with the incoming response of January 17, 2007.
- A terminal disclaimer has not filed. Accordingly, the rejection is maintained.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

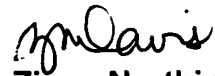

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
